

Public Preferences and Priorities for a Mobility Implementation Plan

Local residents took part in a hands-on workshop to express their local preferences for enhancing the transportation systems in Champaign-Urbana-Savoy. Working on a two-by-two square mile map, and using Neighborhood TransopolySM to express their values, participants made the recommendations that are reported here. Many of the participants were affiliated with Regional Partner* organizations, groups that helped to recruit a broad cross-section of the community.

The sponsor of the workshop was the Champaign-Urbana Mass Transit District. This workshop was one of eight held throughout the area during October and November of 2006. The map for this workshop is shown below.

South Champaign/Savoy

What is Neighborhood Transopoly?

Neighborhood Transopoly is a tool to help diverse individuals build consensus in a short period of time about local transportation needs. The tool uses a game-like format to break complex issues into manageable concepts and “levels the playing field” for people who do not ordinarily participate in transportation planning discussions.

Transopoly groups generate data on two-mile-by-two-mile maps, to simulate their priorities for up to \$30 million of transportation investment (see photos of completed maps for this meeting on page 8). The data from each of eight meetings in Champaign-Urbana-Savoy will be combined into a final report, to be released early in 2007.

Neighborhood Transopoly offers five ways for participants to express preferences, all of which are reported on the following pages.

- **Problems and Opportunities** are discussed to develop a context for each group’s recommendations.
- **Basic Infrastructure** like roads, transit services, sidewalks and bicycle paths can be selected.
- **Other Amenities** includes smaller improvements like signage, lighting, planters, trees and similar amenities.
- **Packages** represent streetscape themes like safety or economic development (see page 4 for the full list of packages).
- **Policies and Innovations** reflect additional ideas that are not standard in the Neighborhood Transopoly tool.

In addition to the group exercises above, individual surveys were completed by most Transopoly participants. Survey results are also included here.

* See the back of the report for a list of Regional Partners

Problems and Opportunities

Before making any recommendations about future transportation improvements, the groups created their own list of problems and opportunities, which are recorded below. The starred items were identified by each group as priorities.

GROUP 1

PROBLEMS	OPPORTUNITIES
*Kirby/Mattis/Prospect: congestion at intersections	Traffic calming could be implemented throughout this area
Old Farm Shops - Parking lot tight (Kirby & Mattis)	
Parking lot tight at Carle Facility	
Devonshire Dr - traffic too fast	
Parkland Dr residential areas - traffic too fast	
*Design of bus routes - no grid system, not convenient	Grid system should be adopted
School bus issues - kids' discipline on city buses	
*Upcoming concern: Curtis Rd at I-57 interchange will increase traffic overall	Chance to provide good planning features
Fragmented bike paths, sharing roadway	Connect bike paths to parks and open space

GROUP 2

N Prospect congestion	
*Downtown Champaign - daytime parking	
*Traffic on Kirby around Hessel Park and east	Turn arrow at Florida and Kirby
Safety issue with fast-moving traffic on Neil St/US 45 (in Savoy)	
*Connectivity: cul-de-sac layout is okay when on edge of town, but growth causes great inefficiency	Bike paths pretty good, could be easier to cross arterials
On Green St heading west there is no left turn arrow onto 1st	

Basic Infrastructure Selected

Each group had the option to select road lanes, sidewalks, bike paths and transit service and similar, larger units in a transportation network. These ranged in price from \$50,000 per half mile to \$5,000,000 per half mile. The chart below displays the units purchased and the streets to which they were applied.

	GROUP 1	Locations	GROUP 2	Locations
Bicycle path \$50,000/half mile	3	W Windsor Rd	4	W Kirby Ave
Bicycle/pedestrian overpass \$2,500,000 each	2	Fox & St Mary's Rd, Kirby & Crescent	1	W Kirby Ave at Neil St/RR crossing
Sidewalk \$200,000/half mile	4.5	Several residential streets to west of Mattis (connection to proposed bus service on Mattis)	4	Windsor Rd east from Neil St to Race St
Increase bus service \$1,000,000/half mile	5	S Mattis Ave		
Express bus service \$1,000,000/half mile				
Street car or light rail \$3,000,000/half mile				
Neighborhood circulator \$5,000,000 each				
Station \$5,000,000 each				
Turning Lanes/Signals \$400,000/intersection	1	S Prospect Ave	2	1st & Florida, 1st & Green St
Road construction \$5,000,000/half mile	1.5	S Prospect Ave		
Publicly owned parking structure \$4,000,000 each	1	Curtis/Windsor	1	Downtown Champaign

Streetscape Packages Selected

Each group had the option of choosing streetscape packages, which ranged in price from \$200,000 per half mile to \$5,500,000 per half mile. The chart below displays the number of packages each group purchased and the streets to which the packages were applied.

Half Mile Packages	GROUP 1	Locations	GROUP 2	Locations
Safe, Physically Active Streets \$600,000				
Congestion Relief, grid \$200,000				
Congestion Relief, not a grid \$550,000				
Economic Development by Auto \$5,500,000	1	West of Mattis on Curtis		
Economic Development by Transit, Foot and Bicycle \$1,000,000			1	S State St
Quieter, Greener Residential Streets \$500,000	1	Devonshire Dr		

Policies and Innovations

Participants were not limited to the prepared materials standard to the game (Basic Infrastructure and Streetscape Packages). They were encouraged to list Policies and Innovations that they considered important, whether they could apply a “cost” to it or not. The Policies and Innovations offered are listed below.

GROUP 2

Curtis Rd and First St need to be widened before growth south of Champaign takes place (i.e., new subdivisions coming in - Prairie Meadows, Lake Falls, etc.
To ensure connectivity limit cul-de-sacs to 8 per square mile (or less?)

Survey Results

Individuals provided information and opinions through a survey immediately before playing Transopoly. The results of most of the questions are below. Some questions, including home and work location and the amount of time and distance for frequent trips, vary too widely to be reported in this tabular format but will be analyzed as part of the larger study.

Employment status

Employed	Employed at home	Student	Employed + Student	Homemaker	Unemployed	Retired
4	1	-	-	-	-	-

If a student, where?

UIUC	Parkland	High School	Other
-	-	-	-

How do you most often travel?

Drive alone	Drive with another adult	Ride with others	Bus	Walk	Bicycle	Other
5	-	-	-	-	-	-

How many days a week do you

<i>Number of days per week</i>	Number of responses						
	<i>One</i>	<i>Two</i>	<i>Three</i>	<i>Four</i>	<i>Five</i>	<i>Six</i>	<i>Seven</i>
Drive a car	-	-	1	-	-	1	3
Ride the bus	1	1	-	-	-	-	-
Bicycle to a destination	-	-	-	-	1	-	-
Walk to a destination	2	-	-	-	-	-	-

How important is each of the following factors in your travel choice decisions? (on a scale of 1 to 5, with 1 being not important and 5 being very important)

	Trip time	Safety	Trip cost	Effect on environment	Parking: free or paid	Ease and convenience
Avg of responses	3.2	3.0	2.6	2.8	3.0	3.8

How likely are you to try a mode other than driving alone, based on the following incentives? (on a scale of 1 to 5, with 1 being not likely and 5 being very likely)

	Avg of responses
Direct buses that ran frequently on all major streets	3.0
Express commuter buses from outlying neighborhoods to the downtowns and UIUC	1.6
Improved bike lanes and bike paths on all major travel corridors	3.0
Improved sidewalks in your neighborhood	3.0
Shuttle bus that connected the stores in the Market Place and North Prospect area and ran every 10-15 minutes	1.6

Assuming that Champaign-Urbana’s population will grow over the next 20 years, how important to the community do you think each of the following improvements will be? (On a scale of 1 to 5 with 1 being not important and 5 being very important)

	Avg of responses
Sidewalks in more neighborhoods and commercial areas	4.0
Expanded bike path system	3.8
Widening of key streets to handle more traffic	3.6
More frequent transit service throughout the city	4.0
Faster, more direct bus service to UIUC an the downtowns	3.6
More street lighting	3.8
Increased parking around UIUC campus	2.6
Increased parking in the downtown areas	3.2

Experts say that land us and transportation shape one another. Should we use land use tools (such as zoning and density controls) to encourage more compact development within the cities of Champaign and Urbana in order to promote alternate modes of transportation including public transit, biking and walking?

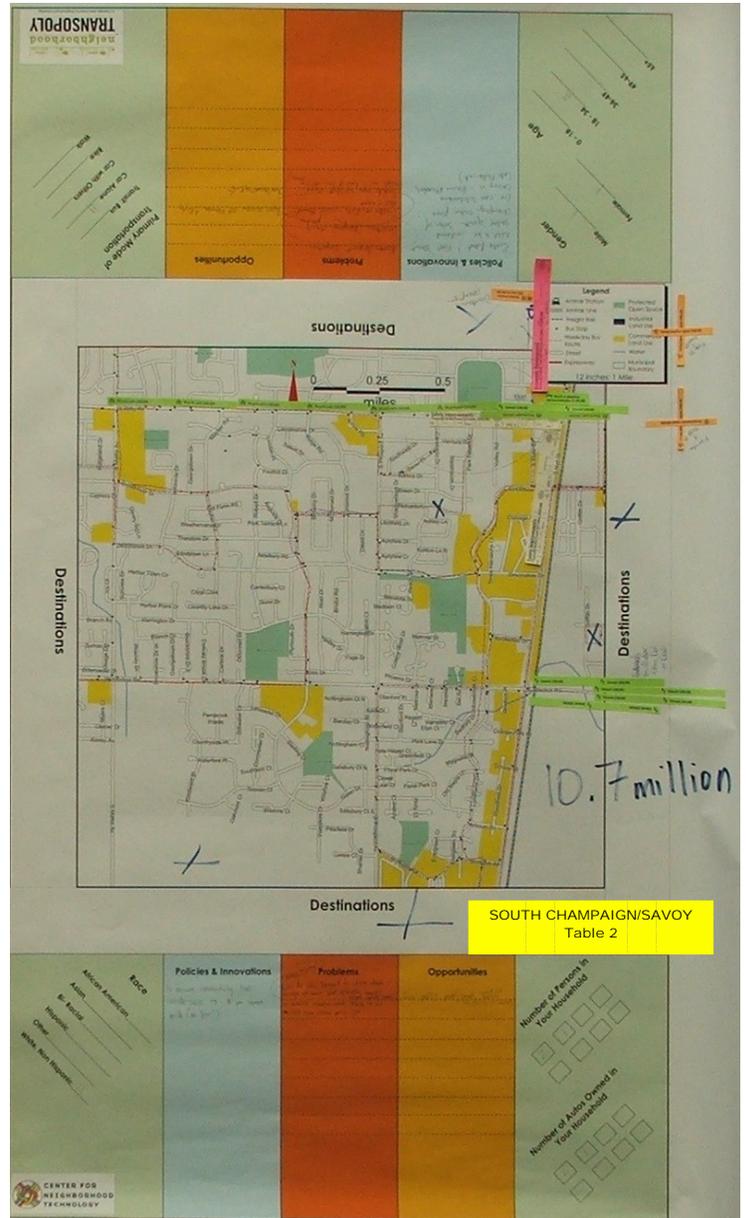

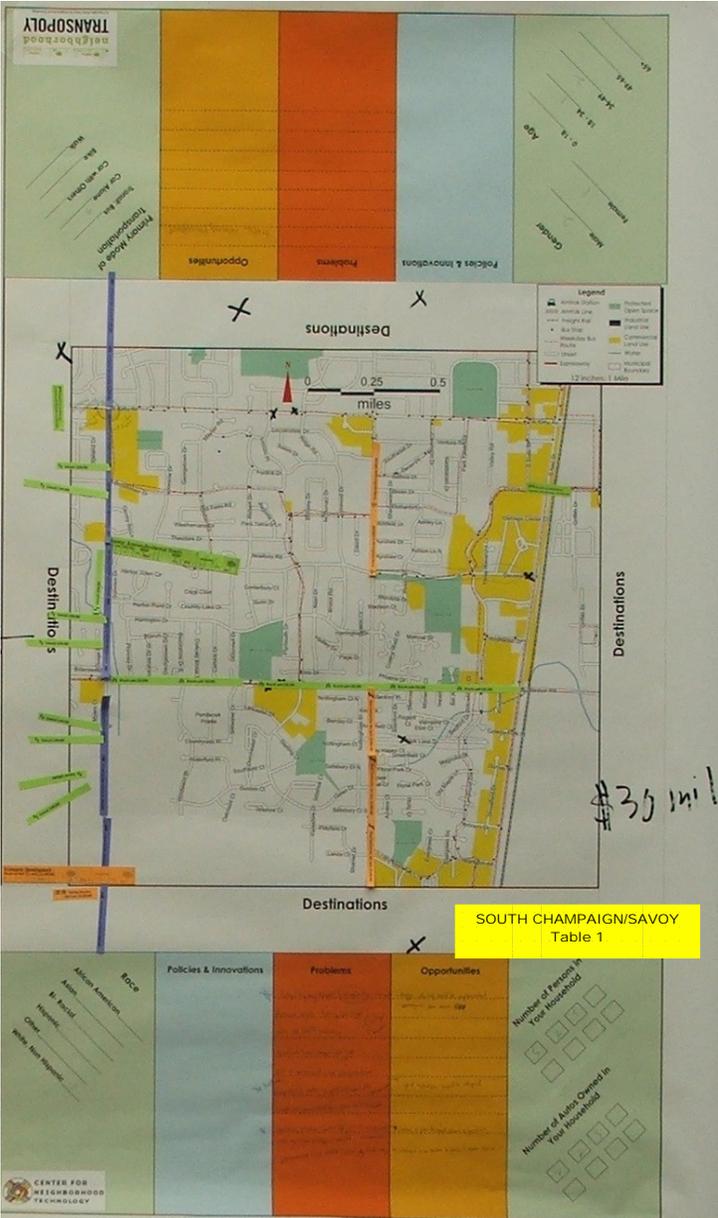

Yes	4	No	1
-----	---	----	---

Do you support increasing the level of tax funding for transportation in order to provide increased transportation choices in Champaign County? If yes, how should the increased funds for transportation be obtained?

	Number of responses
Increase gasoline tax	3
Increase sales tax	1
Transfer funds from other public programs	-
Other	-

Demographics

Average number of vehicles/household	2
Age: 35 or younger	3
Age: 36-65	2
Age: 66 or older	-
Gender: Male	3
Gender: Female	2
Racial/ethnic: African-American	-
Racial/ethnic: Asian	-
Racial/ethnic: Caucasian, non-Hispanic	5
Racial/ethnic: Hispanic	-
Racial/ethnic: Other	-
Household Income: Less than \$13,000	-
Household Income: \$13,000 to \$19,999	-
Household Income: \$20,000 to \$29,999	-
Household Income: \$30,000 to \$39,999	-
Household Income: \$40,000 to \$49,999	-
Household Income: \$50,000 to \$74,999	3
Household Income: \$75,000 to \$99,999	1
Household Income: \$100,000 or more	-

Color code

- Narrow green strips New Sidewalk or Bicycle
- Narrow blue strips New Transit Lines
- Narrow orange strips New Road Lanes, Parking

- Wide buff strips Safety Improvement Package
- Wide salmon strips Congestion Relief Package (Grid Streets)
- Wide yellow strips Congestion Relief Package (Highways)
- Wide orange strips Economic Development Package (Access by Auto)
- Wide magenta strips Economic Development Package (Access by Transit, Foot and Bicycle)
- Wide green strips Quieter, Greener Residential Street Package

Other, smaller pieces may not be decipherable on maps but are recorded in text.
